Select 'Transaction type details' to view the different transaction category descriptions.

Enabling debit card transaction restrictions through your TCB Online/Mobile banking profile is convenient and user-friendly.

**To protect your debit card from unauthorized transactions with transaction types you don't typically use, enable this security feature.**

- Enabling this block will prevent debit card usage for the transaction type(s) selected.
- If you plan to use your TCB debit card(s) for the currently restricted transaction type, you can easily remove the restriction by unchecking the block transaction box and then re-enabling it upon your preference.
- Enable the 'Transaction Type' protection option for all debit cards linked to your TCB Online/Mobile banking profile.
- If planning to travel, make sure to add a travel notification of your upcoming destinations and timeframe. You can complete this process within your TCB Online/Mobile banking profile under **Card Management** > select the airplane icon > select **Add travel notice**.
- Before your trip, make sure your contact information is current. You can check and update this in your TCB online banking profile under **Personal Settings** > **Profile**.
