

TCB Security Tool - Card Management

Debit Card Transaction Restrictions - **Locations**

To complete the process, follow these steps: Log into your TCB Online/Mobile banking profile > scroll down, locate **Card Management** > select the debit card > select **Alerts and Protection** > select **Locations** > checkmark Block Transactions > **Save**.

Displayed Setting: Ready to Restrict When Needed

Enabling debit card transaction restrictions through your TCB Online/Mobile banking profile is convenient and user-friendly.

To protect your debit card from unauthorized international transactions while you are not traveling, enable this security feature.

- Enabling this block will prevent in-person international card usage, but online transactions with international merchant processors will still be possible.
- If you plan to travel internationally and use your TCB debit card(s) during your trip, you can easily remove the restriction by unchecking the block transaction box and then re-enabling it upon your return.
- Enable the 'Locations' protection option for all debit cards linked to your TCB Online/Mobile banking profile.
- If planning to travel, make sure to add a travel notification of your upcoming destinations and timeframe. You can complete this process within your TCB Online/Mobile banking profile under **Card Management** > select the airplane icon > select **Add travel notice**.
- Before your trip, make sure your contact information is current. You can check and update this in your TCB online banking profile under **Personal Settings** > **Profile**.
